New Offering: The Arcturian Codex

This is an Arcturian Healing Method process which imprints the information for the full development of your subtle bodies for this and future incarnations. Evolution of consciousness includes the formation of more complex and complete subtle body structures. This is the process which will accelerate the acquisition of these subtle body structures that will come in the future for all of humanity. This process imprints them now. 2 sessions are required to fully download the information into your system. The two sessions must be done within 72 hours of each other. The sessions can be done in-person or by distance. Cost \$555

- 1) Symbol of Life:** The imprinting and activation of the Symbol of Life-an important glyph and information field which allows you to hold onto information from lifetime to lifetime.
- 2) Activation of the 12 Petals of the Heart Chakra:** Humanity currently has 6 of 12 petals of the heart chakra activated. Our goal is to activate the remaining 6 petals. This part of the codex activates fully the remaining 6 petals of the heart chakra.
- 3) Pineal Gland Activation:** This part of the codex opens up the pineal gland at the center of the head which is an important terminal in the subtle bodies for information from the Higher Soul. It furthers strengthens the connection from the pineal gland to the first chakra above the head which makes this connection like an information super-highway to the soul.
- 4) Activation of the Thunder Chakra:** The Thunder Chakra is located below the root chakra or perineum. This is where the etheric body and astral body connect to each other and where the source of vitality and energetic strength lies for people. Full activation of the Thunder Chakra leads to owning your inner power.
- 5) Connection of Your Inner Grid Lines to the Greater Grid Lines of the Earth, Other Star Systems, the Universe, and Parallel Universes:** This part of the Codex connects your personal energetic circuitry to the greater expansive energy circuitry of the Earth, other star systems, and the universe. This leads to multidimensional awareness and capacities.
- 6) Activation of 9 Energy Nodes Above the Head:** This part of the Codex strengthens the pillar of light above the head and fully activates the 9 energy nodes starting from the crown chakra and rising above the head. Each node allows for higher states of consciousness and connections to higher spiritual beings.

7) Activation of 9 Energy Nodes Below the Body: This activation opens up the dragon gates below the body for full alignment, grounding, and access to the earth energy information field as well as conscious connection to spiritual beings in the Earth. This also further aligns you to the Divine Sophia or feminine aspect of God which is the spiritual being of the Earth.

8) Activation of the Central Channel of Energy In the Body: This aspect of the Codex opens and activates your central channel of energy running vertically in your body. Activation of this channel allows all the chakras to be connected, full access and flow of the kundalini energy, and awareness of non-dual states of consciousness.

9) Awakening of the Third Eye Tunnel: The third eye consists of an energetic tunnel running from between the eyebrows to the back of the head. This part of the Codex cleanses and opens this channel and the key energy points in this structure. This allows for clairvoyance and higher visionary states of consciousness.

10) Activation of the Belly/Lower Dan Tien/Hara/Cauldron: The belly center houses your divine will and power. This part of the codex brings this center fully on-line to access your deepest desires, to act, and to carry out your spiritual mission. This is your Will Center.

11) Activation of the Uraeus or Unicorn Light: This part of the codex opens up unique energy centers in the forehead. These specialized centers allow for deep penetration and insight into subtle energies coming from higher dimensions. These centers are symbolically represented by the serpent emerging out of the headdresses of Egyptian Dieties and Pharoahs as well as the horn of the Unicorn.

12) Activation of the 3 Guardian Shields Surrounding the Body: There are 3 Guardian Energy Shields that protect the subtle bodies from entry of noxious energetic substances. This activation brings these 3 Guardian Energy Shields, known as the Wei Chi Fields in Chinese Medicine, fully on-line for your system.

Dimensional Analysis and Balancing (DAB)

There is a new healing offering called Dimensional Analysis and Balancing (DAB) which allow the client and myself to look at any issue (illness, person, organ, relationship, business, etc) and energetically diagnose what dimension and specifically which subdivisions on that dimension that issue needs balancing. The second part of the session then provides energetic and vibrational healing to center and balance those affected dimensions.

What are the different dimensions? The dimensions as defined by this system are the physical, etheric, emotional, mental, causal, spiritual, and divine. For example, in this session, we can see if an affected organ needs balancing on one of these dimensions. Its symptoms may be arising on the physical level but the cause is on one of these other dimensions. This energetic diagnosis will allow us to see which dimension emanates the cause.

In addition, this energetic tool will allow a deeper analysis as to the subdivisions that are affected at each dimension. For example, if the emotional dimension is affected, we can further see 12 subdivisions on the emotional plane that could be affected. This fine gradation can help pinpoint the exact level of the cause of the problem. We can look at 3 physical sub-divisions, 9 etheric subdivisions, 12 emotional subdivisions, 12 mental subdivisions, 12 causal subdivisions, and 12 spiritual subdivisions.

Once we have this assessment, we center and balance those affected areas.

What you can expect out of this session:

- Analysis of 2 major issues or problems including illness, person, organ, relationship, business, and more (1 hour)
- Balancing and centering of those affected dimensions and their affected subdivisions.
- Permanent linkage to balancing elements for those issues or problems. Allows for 24/7 balancing to occur for affected issues.
- In-depth information as to the cause of certain problems. Hard to heal issues will benefit greatly by knowing exactly which dimension the cause emanates from.

Cost \$250/hr.
